CHOSUN UNIVERSITY

We started out as Korea's first private university in 1946. At that time the longing of all 72,000 citizens of the Honam region to build a strong nation and develop world-leading global talents united them to found Chosun University. Today, we are aiming at innovation based on deep-rooted conviction and are heading confidently towards a century of harmony and communication based on the 70-year legacy of Chosun University scholars and alumni.

INNOVATIVE CHOSUN
HAPPY UNIVERSITY

INNOVATION CAPABILITY

Chosun University continues to innovate as it goes forward into the future,
aiming to build further on its 70 years of august history and tradition.

THE WAY WE HAPPY
We hope that today is happier than yesterday, that tomorrow will be brighter than today.
We dream of a harmonious society, and a richer world.

WALK WITH US

We will take an ambitious step towards the world, towards the future through the harmony of people and society, and the convergence of heart and technology.

Chosun University begins its ambitious drive towards a new history

Chosun University, founded in 1946 as Korea's first private university based on the noble dreams of the 72,000 Founders' Association members, is this year commemorating its 70th anniversary. As the slogan "70 years of power, Chosun University takes a leap forward" suggests, the 70 year history of Chosun University was the driving force behind the history of the region, and the history of Korea. Now, Chosun University will begin an ambitious drive to write a new history as it reaches for its centennial celebration.

CHOSUN UNIVERSITY IS AT THE CENTER OF REGIONAL DEVELOPMENT

Since its founding Chosun University has been consistently selected for major government-funded national projects in the fields of education, research, and industry-university cooperation, including ACE, BK21 PLUS, LINC, CK-1, Support for High School Education, and Business Establishment University Development initiatives. With six projects under way, Chosun University holds the record in the Gwangju, Jeonnam and Jeju provinces. Based on such accomplishments, Chosun University is now taking a leap forward to become the center of regional development in the Honam Region through its leadership in education, industry, economics, employment, culture and welfare.

CHOSUN UNIVERSITY FOCUSES ON "COOPERATIVE" TALENT DEVELOPMENT

Chosun University, recognized for its higher education, develops "cooperative" talents through the ACE project. We are striving to overcome the limits of traditional competitive, "alone" education and culture, while aiming for greater good through "cooperative" talent and culture development. In order to achieve these outcomes, more than one hundred projects with the goal to "teach and embrace deeper" through college education are under implementation. Chosun University is a truly student-centric university where the students are happy.

CHOSUN UNIVERSITY CREATES GLOBAL BRAND VALUE

The driving motto of Chosun University is, "Local universities can overcome limitations through internationalization." Accordingly, as a result of our ambitious drive to become a leader of international exchange we have enhanced our standing in all international indexes. A large variety of global projects is now under implementation and we have also signed MOUs with 684 universities and institutions in 42 countries across Asia, Europe and Africa. Students will meet Chosun colleagues from all of the five seas and six continents.

In commemoration of its 70th anniversary, Chosun University will build its far-sighted plan for talent development to achieve our goal of becoming a world leading university.

Chae-Hong SUH President of Chosun University

Chosun University is Korea's first private university, built on the philosophy of 72,000 people.

In April, 1946, after Korea's liberation, the Chosun College Founders' Association was established with the aim to reconstruct the liberated nation.

The public, ranging from governors, town chiefs, "gisaeng" and farmers participated voluntarily by purchasing a founding membership. At the time membership cost 100 KRW which was enough to buy 40kg of rice. Local farmers and day laborers of limited means also contributed towards this noble endeavor of reconstructing the nation through education by donating some of their harvests of sesame seeds, laver, seaweed and other necessities. Then, based on the willpower of the 72,000 Founders' Association members, Chosun University, Korea's first private university, and Honam region's first private school, was founded in 1946.

In 2016, Chosun University commemorates its 70th anniversary while continuing the spirit and philosophy of the Founders' Association and leading the rapid development and innovation of the nation into the future.

We must educate our people to reconstruct our national culture even though we build walls with clay, doors with paper, houses from barns, whatever it takes.

In this era of confusion and need, we shall overcome all difficulties, and establish the world's most advanced educational institution. We will develop thousands of national leaders who will relieve us from such hardships and poverty. Please join our efforts and become a member of the Chosun College Founders' Association.

–

From the Chosun College Founders' Association Membership Invitation Letter

We will succeed and
develop the spirit and philosophy of
the Founders' Association

The roots of our educational foundation are the Chosun College Founders' Association, who built the school of their own will. How has the spirit been inherited and realized today?

Our foundation was built on the sincere commitment of the 72,000 Founders' Association members in 1946. At present, seven schools including Chosun University, Chosun Nursing College, Chosun College of Science and Technology, Chosun University High School, Chosun University Girls High School, Chosun University Boys Middle School, Chosun University Girls Middle School, and Chosun University Hospital and Chosun University Dental Hospital all belong to the foundation. All members of our foundation are endeavoring to strengthen our position as a distinguished private institution through developing talents for the new era based on the foundational philosophy of specialized education, productive education, and gifted education.

2016 is the 70th anniversary of Chosun University as well as the establishment of the Founders' Association. How do you feel as the Director of the Foundation?

"I have witnessed the development of Chosun University since 2010, as the 17th and 18th Director. This year, the members are working closer than ever, while learning and working environments have been greatly improved. On my inauguration, I proclaimed I would build Chosun University's image in the local community as a unified, competent school. I am proud to announce that this has been achieved."

Please tell us about the financial plans to support the stable development of Chosun University.

"The school foundation has been operated as a provisional directorship for 22 years, therefore it is true that sometimes efforts toward enhancing school competence were not 100% demonstrated. Our school does not receive support from companies, but rather depends on tuition fees, donations, and government funding. In the future, we will build a closer relationship with the Ministry of Education to receive as much support as possible, and we will support professors to cultivate students of ability. When we build competence, we will look forward to corporate support."

On your inauguration, you mentioned that "harmony" is the most important factor for the school's development. What does the word "harmony" mean to you?

"Many students, faculty, alumni, parents, and the local community show great affection for Chosun University. The deeper the affection, the deeper the concerns, and that is where conflicts can arise. By 'harmony', I mean that everybody will contribute their own efforts to build a promising future together."

What is the school foundation's role in the development of Chosun University?

"First of all, I have tremendous responsibilities as the Director, so I must and will take the initiative. Since my inauguration, I have been communicating with individuals and organizations that value our school, and have been asking for their support."

"Furthermore, members need to enhance the school's competence through increased employment rates, recruiting professors, and specialized projects. The members need to overcome their inconveniences to come together, communicate, and show their support. Such efforts are critical to enhancing school competence."

"The foundation will be devoted to supporting Chosun University's development into a leading school of the 21st century."

Chosun University Director, Hyun-Wook KANG

1940s
Beginning of the National University Story

05.04.1946 An organizing committee was formed to establish the Chosun College Founders' Association.
29.06.1946 11 committee members were elected to lead the initial Founders' Association for Chosun College and the affiliated manufacturing plant.
08.1946 Chosun College Founders' Association was formally established in the Gwangjuseo Middle School auditorium.
09.09.1946 The Gwangju Evening Academy was established by the Chosun College Founders' Association
29.09.1946 Formal opening of the Gwangju Evening Academy (4 divisions, 12 departments, 1,194 students)
23.11.1946 Gwangju Evening Academy changed to Chosun Academy. Korean government authorized the expansion of divisions, departments, and students.
01.12.1946 The Chosun College Founders' Association (CCFA) announced a university prospectus for membership invitation; fundraising activities for the CCFA commenced.
31.12.1947 72,000 members enlisted in the Chosun College Founders' Association
26.05.1948 Establishment of Chosun University was approved. Chosun Academy was approved as Chosun College.

1950~1980s
Development into a Distinguished University

31.08.1951 The faculties were reorganized into colleges.
10.03.1951 Chosun College elevated to Chosun University. Graduate Schools established.
30.10.1951 Evening College was established to provide college education to military personnel (regular four-year curriculum) according to the Army Education Headquarters.
31.05.1957 Graduate Schools for doctoral and honorary degrees established.
26.09.1959 College of Pharmacy established.
09.01.1965 College of Education established.
22.12.1966 College of Medicine established.
15.04.1971 Chosun University Hospital opened.
31.12.1971 College of Physical Education established.
28.12.1973 College of Dentistry established.
11.01.1978 Affiliated Women's Junior College reorganized as Women's Industrial College.
07.10.1978 College of Business established.
26.10.1978 Chosun University Dental Hospital opened.
30.12.1978 Graduate School of Education established.
22.09.1979 College of Foreign Studies established.
05.12.1979 Graduate School of Industry established.
02.10.1980 College of Fine Arts established.
06.11.1986 College of Liberal Arts & Sciences reorganized and separated into College of Humanities and College of Natural Sciences.
01.03.1989 College of Law & Political Science reorganized and separated into the College of Law and College of Social Sciences.

1990s
Development into a Specialized University

13.06.1992 Construction of Faculty Bldg began
19.08.1992 Construction of Natural Sciences Bldg began
19.10.1992 Construction of College of Pharmacy Laboratory began
13.08.1993 Gwangju-Jeonnam Center of Korea Institute of Industrial Technology established as designated by the Ministry of Commerce & Industry
04.09.1993 Graduate School of Environmental & Health Sciences established
01.05.1994 Long-term development plan established
21.10.1994 Graduate School of Small & Medium Enterprises established
27.02.1995 Transportation Parts Manufacturing Automation Research Laboratory established as designated by the Korea Science & Engineering Foundation
01.03.1995 Integrated Information System building project launched
12.05.1995 Social Education Center established
14.06.1995 Training Center for Middle School Teachers affiliated to College of Education established
18.10.1995 Graduate School of Local Policies established
01.03.1996 Foreign Language Education Center established
29.03.1996 Construction of Naval Architecture Engineering Bldg.
01.07.1996 Construction of 2nd Medical School Bldg.
24.10.1996 College of Industry reorganized as the College of Information Science College of Foreign Languages reorganized as the College of Foreign Studies
02.11.1996 Graduate School of Local Policies renamed as the Graduate School of Policies
30.01.1997 Gwangju-Jeonnam Techno Center for Parts Industry established as designated by the Ministry of Trade and Industry
03.02.1997 Voluntary Service Troop established
01.03.1997 Industry-University Cooperation Foundation established
29.08.1997 Construction of College of Engineering, 3rd Bldg.
10.11.1997 Selected by the Ministry of Education for the Local University Specialization Project in the field of Industrial Design
10.03.1998 Construction of Industry-University Cooperation Bldg, FMS Plant began
28.05.1998 Established Information & Communications Business Incubator Center as designated by the Ministry of Information & Communication
22.06.1998 Established Business Incubator Center as designated by the Small & Medium Business Administration
01.09.1998 Graduate School of Small & Medium Enterprises renamed as the Graduate School of Business
15.09.1998 Construction of Welfare Center, 2nd Bldg.
19.10.1998 Transfer course for juniors in College of Nursing Evening Class newly organized (40 students)
28.02.1999 Construction of Student Welfare Center College of Information Science discontinued due to the new academic system
24.04.1999 Gwangju-Jeonnam Techno Park Support Center established
04.08.1999 Internet Business Incubator Center established as designated by the Small & Medium Business Administration
16.08.1999 Chosun University–SDS Multi-Campus established as designated by the Ministry of Information & Communication
15.09.1999 Electronic Parts & Material Design Education Center established
02.11.1999 Software Common Equipment Support Team established as designated by the Ministry of Information & Communication

2000s
Vision Proclamation as a Global University

01.03.2000 New Biomaterial Research Center established
01.04.2000 Virtual Education Center established
20.06.2000 Electronic Calculation Center renamed as the Information & Computing Institute
01.07.2000 Designated as an Engineering Research Center by the Ministry of Science & Technology Protein material Research Center established
10.07.2000 Classic Study Center established
13.07.2000 Designated as a Local Lifelong Education Information Center by the Ministry of Education
18.07.2000 Collaborative courses among graduate schools, academy-research-industry collaborative courses for graduate schools newly introduced
25.08.2000 College of Electronics & Information Engineering, Optical Technology Engineering Department, Selective Major Division established
31.08.2000 Chosun University Branch for Gwangju Chamber of Commerce, E-commerce Support Center established
01.10.2000 Instrumentation & Control Engineering Education Center established
10.10.2000 Construction of College of Pharmacy, College of Medicine Clinical Faculty Bldg.
13.11.2000 Chosun University Dental Hospital newly built
30.11.2000 Construction of Business Incubator Center
01.12.2000 Tele-education Training Center affiliated with Chosun University established
01.03.2001 College of Foreign Studies renamed as College of Foreign Languages
30.03.2001 Chosun University Hospital selected as a '2002 FIFA Worldcup Designated Hospital'
23.04.2001 ISO 9001 authentication for International Standard in Quality Management System Education & Administrative Services
08.06.2001 Tele-education Training Center affiliated with Chosun University renamed as Chosun University College of Education, Middle School Education Center
20.06.2001 Designated as a Regional Research Center of the Ministry of Education Laser New Technology Development Research Center established
24.07.2001 Construction of College of Dentistry Bldg.
26.07.2001 Selective Major Division discontinued
Graduate School of Design, Internet Software Engineering Department established
07.08.2001 Designated as an Empirical Science Lab for Solar Energy Commercialization (solar ray, solar heat, etc)
17.08.2001 Construction of ROTC bldg.
29.08.2001 Education Support Center established
25.10.2001 University Technology Transfer Center established
26.02.2002 Construction of dormitory
01.04.2002 Nuclear Plant & Electric Power Supply Reliability Research Center established
17.08.2002 Selected as an Advanced University for Education Reform by the Ministry of Education
04.10.2002 Construction of the University Library
15.12.2002 Patent Information Support Center established
15.02.2003 Radiation Application Promotion Center established
15.05.2003 Selected as a Cyclotron Research Institute as designated by the Ministry of Education
22.07.2003 Selected for a Local University Development Project as organized by the Ministry of Education, Construction of Gymnasium
01.08.2003 Selected as a Medical Research Center by the Ministry of Science & Technology
26.08.2003 Cultural Industry Research Institute established
05.09.2003 Selected as the Gwangju-Jeonnam Local WISE Center by the Ministry of Education

70 Years of History,
Built on the hopes and dreams of
72,000 patriots

1946 – 2016

01.03.2004 Dept. of Chinese Literature, Dept. of Police Administration, and Dept. of Taekwondo established
09.04.2004 Social Education Center renamed as the Lifelong Education Center
12.04.2004 Industry-University Cooperative Foundation established
04.06.2004 Construction of the College of Law and College of Business buildings commenced
16.06.2004 Selected for the New University for Regional Innovation Project as organized by the Ministry of Education & Human Resources
29.06.2004 Agreement signed for establishment of a Military Science Division
06.08.2004 Construction of College of Medicine Lecture Bldg. and ERC
01.09.2004 Diabetes Research Center, Home Voluntary Support Dispatch Center, Advanced Technology Parts & Materials Specialist Development Project Group established (Industry-University Cooperative Foundation and NURI Project added)
Traditional Food Specialist Development Project Group established
Dental Engineering Specialist Development Project Group established
MCB Specialist Development Project Group established
Marine Specialist Development Project Group established
Machinery-Space Engineering Education Project Team established
Internet Business Incubator Center discontinued
Chosun University Branch for Gwangju Chamber of Commerce,
E-commerce Support Center discontinued (Business completion)
New Biomaterial Research Center discontinued
Advanced Technology Parts Project Group discontinued (Business completion)
23.11.2004 Agreement signed to build Solar Energy Education Promotion Bldg
24.11.2004 Eco-friendly Agriculture Fisheries Research Center, Humanities Advancement Institute established
01.12.2004 Industry-University Cooperative Foundation Kimchi Research Center established
01.03.2005 Military Sciences Division newly established
09.03.2005 ROTC agreement signing ceremony for Chosun University Army 31st Infantry Div.
22.03.2005 Construction of College of Electronics & Information Engineering Bldg.
24.03.2005 Construction of Advanced Industry-University Campus
25.03.2005 Optical Technology Specialist Education Center established
Intellectual Property Center discontinued
Chosun University Electronic Component Specialist Development Project Team established
11.04.2005 Construction of State-run Exam Preparation Bldg in Hwanggeumchu Hall
17.07.2005 Selected as a Culture & Tourism Specialist Development Project Team for New Universities for Regional Innovation (NURI) by the Ministry of Education
05.07.2005 Exam Preparation Bldg., Education Support Center established
26.07.2005 Selected as a Precision Dental Equipment & Component Technology Innovation Center by the Ministry of Commerce, Industry & Energy.
31.08.2005 Graduate School of Environment & Health renamed as the Graduate School of Environment & Health
14.11.2005 Dental Equipment Testing Center, Democracy Act Research Institute established
26.04.2006 Selected for the STEP 2 BK21 (Brain Korea 21) Project by the Ministry of Education & Human Resources.
06.07.2006 Engineering Education Center and Cultural Law & Policy Research Center established
Home Voluntary Support Dispatch Center renamed as the Elderly Citizen Welfare Center
30.11.2006 Community Sports Instructors-Coach Training Center established
Common Equipment Center renamed as the Common Laboratory Center
Instrumentation & Control Engineering Education Center
BK21 Local University Support Project Team and FMS School Enterprise discontinued
01.01.2007 University Council established.
01.03.2007 Dept. of Marine Biotechnology, Counseling Psychology Div., Speech Therapy Div. established
01.06.2007 Formative Arts Research Lab renamed as the Design Research Lab
16.07.2007 Culture Industry Research Institute renamed as the Cultural Contents Industry Research Institute
Engineering Education Institute renamed as the Engineering Education Innovation Center, and affiliated research lab (Overseas Regional Studies Research Institute) established
08.10.2007 Construction began on the Marine Biology Research Center in Wando
19.10.2007 Construction began on the University Library Annex (Special Library for Law)
21.12.2007 Advanced Industry-University Campus Management Headquarters established
24.12.2007 Marine Biology Research Center in Wando opened

18.02.2008 Construction of Productive Business Incubator Center (Advanced Industry-University Campus)
01.03.2008 Aerospace & Naval Architecture Engineering Div. (Naval Architecture Engineering Major, Aerospace Engineering Major) separated into the Dept. of Naval Architecture Engineering and Dept. of Aerospace Engineering
Information Communication Div. (Information Communication Engineering, Instrumentation & Control Engineering) separated into the Dept. of Information Communication Engineering and the Dept. of Instrumentation & Robotic Controls Engineering
Affiliated Education Support Center renamed as the Academic Affairs Support Center Affiliated Healthcare Center renamed as the Student Affairs Healthcare Center
Affiliated Engineering Education Innovation Center renamed as the College of Engineering Education Innovation Center
Affiliated Common Test Laboratory renamed as the Research Office Common Test Laboratory
Industry-University Co-operation Team and the Electronic Component & Materials Design Education Center discontinued.
Research Ethics Information Center established
Marine Biology Research Center renamed as the Marine Biology Research & Education Center, Southwest District Local Enterprise Customization Training Center established
Humanities Research Center and Humanities Advancement Institute integrated into the Humanities Research Institute.
Northeast Asia Research Center and Social Science Research Center integrated into the Social Science Research Institute.
Local Community Development Research Institute and Business & Economy Research Center integrated into the Knowledge Management Research Institute.
Basic Science Research Center, Construction Technology Research Center, Energy Resource New Technology Research Center, Environment Research Center, Mechanical Technology Research Center, Electronic Information Communication Research Center, Conjugation Process Research Center integrated into the Engineering Technology Research Institute.
Medical Research Center, Clinical Medicine Research Center, and Diabetes Research Center integrated into the Medical Research Institute, Cultural Law and Policy Research Center.
Legal Research Center integrated into the Legal Science Research Institute.
19.03.2008 Selected for the 2008 Local Enterprise Customization Talent Development Project by the Ministry of Education
Industry-University Co-operation Foundation Research Ethics Information Center opened
31.03.2008 Selected for the 2008 Korea-Asia Industrial Co-operation Project by the Ministry of Knowledge and Economy
01.04.2008 Industry-University Co-operation Foundation Institute for East Asian Economics established
14.04.2008 Designated as a Future Pioneer Business by the Ministry of Education
01.05.2008 Industry-University Co-operation Foundation Fusion Technology Center for Control of Harmful Algal Blooming established
26.06.2008 College of Dentistry Bldg. expansion completed
26.08.2008 Chosun selected to participate in the 2008 MRC Development Project by the Ministry of Education, Science and Technology
Research Center for Oral Disease Regulation of the Aged established
04.11.2008 Advanced Industry-University Campus Productive Business Incubator opened
12.11.2008 Chosun selected for the 2009 Resources Development Project Team by the Ministry of Knowledge and Economy
02.03.2009 Medical School and Dental School opened
Dept. of Global Law, Basic Medicine Div., Selective Major Division established
30.03.2009 Industry-University Co-operation Foundation Center for Information of Korean Studies established
03.04.2009 Industry-University Co-operation Foundation Human Resources Development Team for Controlling Infectious Diseases Using Clean Spring Water established
17.04.2009 Real-time IT-NDT Research Center established
30.04.2009 Selected for the 2009 University Educational Capacity Enhancement Project by the Ministry of Education
Selected for the 2009 Local Industry Development Project by the Ministry of Knowledge Economy
Bionic Implant Convergence Industry Network and Business Model Project Team established
01.07.2009 Selected for the Human Resources Development Project for Leading Industries in the Metropolitan Economic Zone by the Ministry of Education
Honam District: Eco-friendly Component Material Industry
Eco-friendly Automobile Component Material Human Resources Development Center
30.08.2009 Affiliated Elderly Citizen Welfare Center discontinued

2010s~
Growth towards becoming a Global University

18.03.2010 Selected for the 2010 University Educational Capacity Enhancement Project by the Ministry of Education
07.07.2010 Selected for the 2010 Convergence Original Technology Development Project by the Ministry of Education
28.07.2010 Selected for the 2010 Public Welfare and Safety Research Project by the Ministry of Education
27.09.2010 Dept. of Design Engineering established
Affiliated IT Research Center restored.
Elderly Citizen Welfare Center restored and renamed as the Social Welfare Center.
Admission Team discontinued and Admission Management Team established under the Admission Office
01.01.2011 College of General Education established
26.05.2011 Selected for the Industrial Complex Campus Support Project
20.08.2011 Construction began on the College of Engineering 2nd Bldg.
29.08.2011 Affiliated Lifelong Distant Education Center established
30.08.2011 Construction began on the Haeoreumgwan (Theater)
28.10.2011 First affiliate company of Chosun University Technology Holdings Ltd. established (TBM Ltd.)
01.11.2011 Graduate School of Clinical Pharmacy established
05.03.2012 Selected for the 2012 Business Incubation Leading University Development Project by the Small & Medium Business Administration
19.03.2012 Special Industry Agency Business Incubation Support Team established
28.03.2012 Selected for the Leaders in Industry-University Cooperation (LINC) Project by the Ministry of Education
23.04.2012 LINC Project Team established
17.05.2012 Construction of Chosun University Campus Industrial Complex approved by the Ministry of Education
01.06.2012 Eco-friendly Automobile Component Material Human Resources Development Center discontinued
30.08.2012 Operation Therapy Division approved by the Ministry of Education
11.07.2013 Selected for the 2013 University Educational Capacity Enhancement Project by the Ministry of Education
21.08.2013 Selected for the Brain Korea 21 Program for Leading Universities & Students (BK21 PLUS) Project by the Ministry of Education
30.09.2013 Graduate School of Industry renamed as the Graduate School of Industrial Technology Convergence
07.02.2014 Jang Hwang-nam Information and Communication Museum established
01.03.2014 Dept. of Health Science, Dept. of Welding & Joining Engineering, and Dept. of Sports Industry all established concurrently
- Admission departments integrated
Dept. of Biology, Dept. of Life Engineering, and Dept. of Marine Biology integrated into the Dept. of Life Science and Dept. of Biomedical Science
Dept. of Law and Dept. of Global Law integrated into the Dept. of Law Dept. of Mechanical Design Engineering and Dept. of Mechatronics Engineering integrated into the Dept. of Mechatronics Design Engineering, and then renamed as the Dept. of Mechanical System Engineering Dept. of Biomolecular Engineering and Dept. of Applied Chemical Materials Engineering integrated into the Dept. of Applied Biochemical Engineering, and then renamed as the Dept. of Biochemical and Polymer Science Engineering Dept. of Metals Material Engineering and Dept. of New Materials Engineering integrated into the Dept. of Materials Engineering Dept. of Electronic Engineering and Dept. of Instrumentation and Robotic Controls Engineering integrated into the Dept. of Electronic Engineering Dept. of German Language Education and Dept. of German Language integrated into the Dept. of German Language and Culture Departments for Admission renamed as the Dept. of Administration & Student Welfare Div. of Computer Engineering renamed as the Dept. of Computer Engineering Div. of Arts (Western Painting, Sculpture, Media & Print) divided into the Dept. of Drawing and Painting (Western Painting) and Dept. of Arts (Sculpture, Media & Print) Div. of Arts (Korean Painting) renamed as the Dept. of Drawing and Painting (Korean Painting) Div. of Arts (Visual Culture Curator) renamed as the Dept. of Arts (Visual Culture Curator) Div. of Design (Visual & Package Design) renamed as the Dept. of Visual Design Div. of Cartoons & Animation renamed as the Dept. of Cartoons & Animation Div. of Physical Education renamed Dept. of Physical Education Dept. of History renamed Dept. of History and Culture
- Dept.s for Admission changed affiliations
Independent Divisions (Military Science, Counseling and Psychology, Language Therapy, Operation Therapy, Basic Medicine) were affiliated to College of Social Science as the Dept. of Military Science, and to College of Health Science as the Dept. of Counseling and Psychology, Dept. of Language Therapy, Dept. of Operation Therapy, and Dept. of Basic Medicine. Dept. of Police Administration changed its belonging from College of Social Science to College of Law
27.03.2014 One-Stop Student Counseling Center was established
08.04.2014 Renamed and newly established Departments for 2015 admission
- Renamed as the Dept. of Arts (Sculpture · Media & Print) ⇒ Dept. of Arts (Modern Sculpture and Media), Dept. of Dance ⇒ Dept. of Performing Art and Dance
- Established: College of Medicine Pre-medical Course, College of Dentistry Pre-Dentistry Course
30.04.2014 Curriculum Research Center was renamed Curriculum Research Advancement Center Affiliated to the College of Basic Education. Military Affairs Administration Office was renamed Reserve Regiment
17.06.2014 Selected for the Support for High School Education Project by the Ministry of Education
14.07.2014 Selected for the 2014 Local University Specialization Project by the Ministry of Education
21.08.2014 Advancement of College Education (ACE) Project Team was established Chosun University Kindergarten was established

Administrative structures were reorganized
09.06.2015 Selected for the Medical Research Center (MRC) by the Ministry of Science, ICT and Future Planning
11.06.2015 Renamed Departments for 2016 admission- Dept. of Mechanical System Engineering was renamed as the Dept. of Mechanical System and Future Automobile Engineering
20.06.2015 Selected as the supervising university for 'University ICT Research Center Development Support Project' by the Ministry of Science, ICT and Future Planning
26.06.2015 The 1st International Student Voluntary Work Troops was established
20.07.2015 Selected for the 2015 Support for High School Education Project by the Ministry of Education
12.10.2015 Selected for additional projects related to the 2015 Support for High School Education Project
16.10.2015 Awarded Grand Prize for university with 'Advanced Educational Capability' from University News Network
19.11.2015 Reselected as the Industry-University Convergence Research Site

Chosun University Symbol Mark

The symbol consists of the character '學' and the name '조선 (Chosun)'. The character means 'to learn', representing Chosun University as a site for learning. The name represents not only the university, but also the nation. The symbol has gone through modifications, however the original form has been maintained for history and authenticity.

The Pine Tree, The Spirit of Chosun University

The chaplain of Chosun University is the pine tree. Pine trees are also the representative plant of our nation. It reflects our will to succeed the spirit and traditional culture of our nation.

The White Crane, The Ideal of Chosun University

The university building, stretched out across the Seoseokgol Valley of the Moodeungsan Mountains, has the form of white cranes making flight.
White cranes are known to nest only on pine trees. Such pride resembles the spirit of the classic scholars, and the ideals of Chosun University.

CU Vision 2020 Emblem

The design motif for the emblem is the Chosun University Main Bldg. The images of innovation and unification are portrayed through the thirteen square forms.
They represent innovation achieved through communication and unity of its members, and the happiness of all members at Chosun University.

INNOVATIVE CHOSUN
HAPPY UNIVERSITY

Towards the world
Towards the future
Chosun University takes flight

Chosun University, which commemorates its 70th anniversary this year, has successfully built a balance of education, research and industry-university co-operation based on solid, financial integrity. As a result, its public reputation has been enhanced, being ranked among the top 3.5% of global universities.
Chosun University overcame risks and enhanced its competence through continual restructuring according to academic units, always being a step ahead of other universities.

In order to secure financial integrity for the future, Chosun University will devise mid-to-long-term financial management plans, and focus its efforts on reducing personnel expenses, implement leasing for space, and ensure stable internal auditing. Through such efforts, we aim at creating ever greater global brand value.

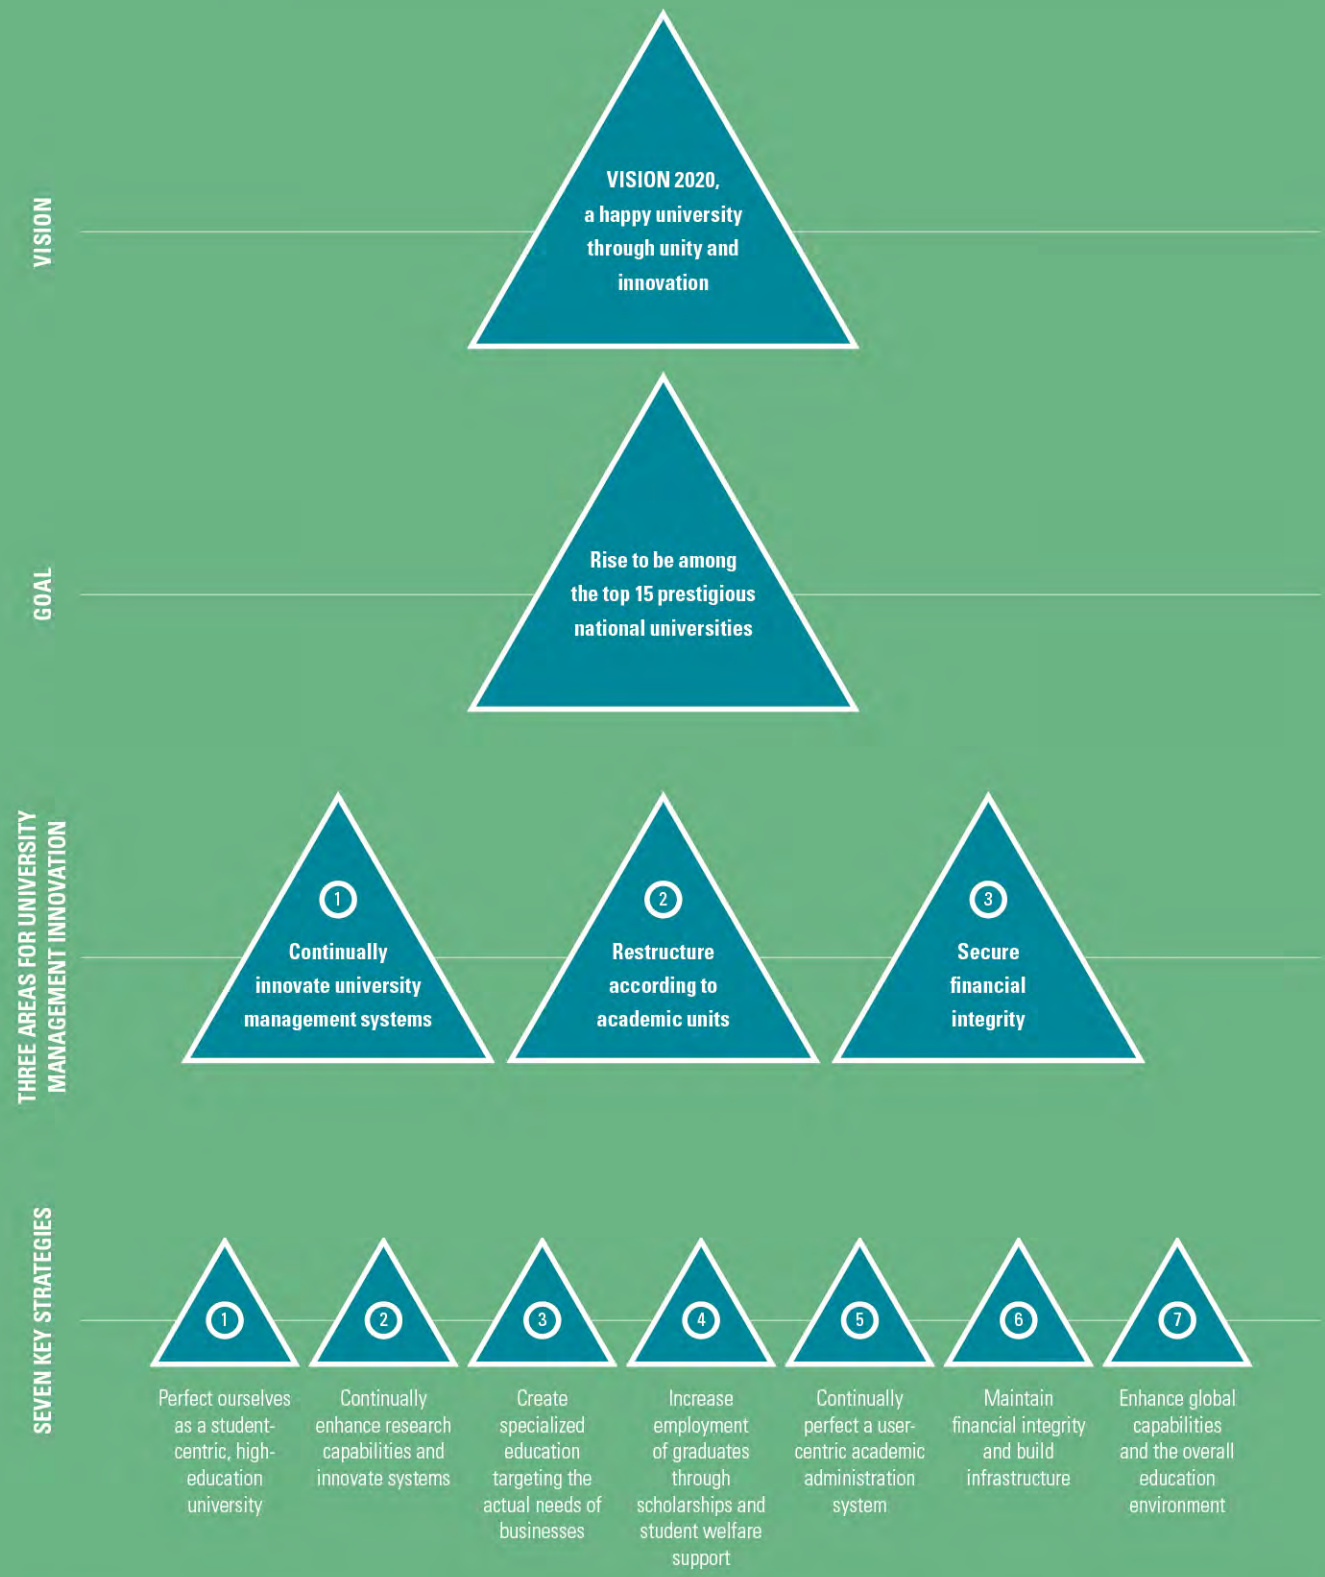
Unity and innovation
A university where everyone is happy

"Vision 2020, a happy university through unity and innovation" is Chosun University's long-term development plan. The goal is to raise its ranking to be among the top 15 universities of the nation as a prestigious, local university. Strategic initiatives including the "3 Areas for University Management Innovation" and "7 Key Strategies" have been established to achieve this goal.



22 Student-Centric, High-Education University 24 Research Capability Enhancement and System Innovation
26 Specialized Education Meeting the Needs of Businesses 28 Increased Employment through Scholarships and Student Welfare
30 User-Centric Academic Administration System 32 Financial Integrity and Infrastructure Building 34 Global Capability and Educational Environment Enhancement

1

Student-Centric, High-Education University

Chosun University aims to be a student-centric, high-education university. Based on its successful implementation of many innovative initiatives the university has been selected by the government for implementing no fewer than six funding projects. Chosun has also been ranked among the top 3.5% in world university rankings and been awarded as an advanced university for educational capabilities, proving its potential to develop into a leading prestigious university of Korea. Chosun University has also established a cultural talent development system that encourages support for the local community through co-operation among students and their colleagues, co-operation with professors, and co-operation of the university with the local community. Today, Chosun students are developing into specialized experts through efficient educational systems, and self-initiated education for their majors.

Key Initiatives

- Secure superior faculty for exclusive lectures
- Reorganize the general education curriculum
- Establish foundation for self-initiated major education
- Reorganize extracurricular activities
- Adjust entrance quota and manage quality of graduation

Selected for six
government-funded projects

Placed among top 3.5%
in world university rankings

9.5 billion KRW support for ACE project

Selected for Advancement of College Education (ACE)

Chosun University has been widely acknowledged for its innovative curriculum reform and the advancement of its teaching-learning support system. Thus, it was selected for the Advancement of College Education project in 2014 initiated by the Ministry of Education from which it received 9.5 billion KRW in funding for four years to promote "cooperative" cultural talent.

Selected for the Support for High School Education Project

Chosun University was selected two years in a row for the Support for High School Education Project launched in 2014 by the Ministry of Education. To implement the project Chosun University received 930 million KRW, which is the highest amount of funding received among universities in the Gwangju, Jeonnam and Jeonbuk regions. As part of the project the university has expanded support for the middle school free-learning semester system, and implemented high school-college connection programs, follow-up programs for students' academic support, and equal opportunity entrance programs.

Established 'Fun-to-Study Campus Culture' to Reinforce General Basic Education

The Chosun University College of General Education is taking the lead in creating a "Fun-to-Study Campus Culture" by grafting professors' research with students' learning. To this end, a general education system has been developed by appointing exclusive faculty for lectures, and establishing the Extracurricular Operation Center.

Established One-stop Student Counseling Center

The One-stop Student Counseling Center has been established to provide counseling services to students. Particularly, gender equal counseling for psychology, career choice and academic studies has been unified. Efficiency and professionalism of counseling services has also been enhanced, and an Integrated Information System has been established, raising students' satisfaction regarding counseling, and creating a genuine academic atmosphere.

2

Research Capability Enhancement and System Innovation

Chosun University has some of the best research infrastructure among universities in Korea and has been aggressively supporting publication of articles in international journals, such as awarding 200 million KRW for articles published in the top three science journals (Nature, Science, and Cell). Based on such support, 854 articles have been published so far in SCI-level journals, and 1,136 articles published in journals registered in or nominated by the National Research Foundation of Korea. University research funds amount to 3.5 billion KRW.
The university is active in its research and has been selected for major projects such as the national technical development project on early diagnosis of dementia (14.7 billion KRW for 6 years), and the leading research center support project (6.78 billion KRW for 7 years).

Key Initiatives

- Establish 'Distinguished Faculty Fellowship Program'
- Appoint superior professors and recruit superior students for graduate school
- Increase paper citations and establish an H-Index management process
- Establish Hardware / Software research contract platform to increase research support funds
- Develop specialized research for community connection through industry-university co-operation clusters

160 billion KRW research fund for 3 years

1,062 projects for 3 years

11.1 billion KRW internal research support funding for 3 years

Selected for the 'National Project for Early Diagnosis Technology Development for Dementia'

Chosun University was selected for the 'National Project for Early Diagnosis Technology Development for Dementia' supported by the Ministry of Science, ICT & Technology, and was supported 14.7 billion KRW in research funds until 2019. The project aims to develop dementia prediction and early diagnosis technology customized to Koreans. Due to the aging of the population dementia has become a serious social issue.

Medical Research Center

The Ministry of Science, ICT & Technology and the National Research Foundation of Korea are supporting the Chosun University Medical Research Center to develop research groups with global competence. The university has been selected to house the 'Cancer Malignancy Mutation Research Center' for which it has received 6.78 billion KRW until 2022 to develop breakthrough technology to reduce death rates caused by malignancy.

Selected as the Leading University for the University ICT Research Center Development Support Project

The Ministry of Science, ICT & Technology and the Institute for Information & Communication Technology Promotion are promoting the 'University ICT Research Center Development Support Project' for which Chosun University was selected as the supervising university for Energy ICT. In 2015 Chosun University received 2.93 billion KRW for four years to develop smart clothing with continuous power supplies and bio signal monitoring.

Selected for the National Research Foundation of Korean Academic Journals

The 'Journal of Law' by the Legal Science Research Institute, 'Chosun Natural Science Journal' by the Basic Sciences Research Institute, 'Humanities Research' by the Humanities Research Institute, 'Northeast Asia Research' by Social Science Research Institute, 'Oral Biology Research' by the Oral Biology Research Institute and the 'Engineering Technology Journal' by the Engineering Technology Research Institute have all been nominated as academic journals for the National Research Foundation of Korea. Their outstanding research capabilities are widely acknowledged.

3

Specialized Education Meeting the Needs of Businesses

"Productive education" lies at the heart of Chosun University's educational philosophy. In order to achieve this, the Industry-University Co-Operative Foundation was established in 2004 to build an industry-university-research co-operative system and lead the development of next-generation growth engines and regional specialization businesses.
The Advanced Industry-University Co-Operation Campus is located within the Scientific Industrial Complex, the research zone of Gwangju, where it provides practical experimental education to students. Furthermore, it has established the Honam region's largest technology holding company that creates profits through the commercialization of university research results, building a leading industry-university co-operation model that shares growth with the local community.

Key Initiatives

- Support development of specialized businesses with university assistance
- Enhance the industry-university co-operation system
- Operate an industry-university co-operative curriculum
- Reinforce the Industry-University Co-Operative Foundation network

Approx. 1,000 industry-university family companies

542 patents fostered during the past 3 years (542 applications, 382 registrations)

1.45 billion KRW of technology transfers during the past 3 years

Advanced Industry-University Cooperation Campus, the incubator of industry-university convergence

The Advanced Industry-University Cooperation Campus is the mecca of industry-university co-operation. In 2013, it was solely selected for the industry-university convergence valley businesses in the Honam region. During the last two years, it has successfully executed industry-university co-operative research, development, and commercialization with approximately 30 local companies through the 'Industry-University Convergence Valley for Manufacturing Production and Metals Industries'. In 2015, it was selected again and is now planning to launch specialized businesses that will lead to employment.

Selected for the Creative Korea-1 (CK-1) Project

Three project teams were selected for the 2014 Creative Korea-1 (CK-1) Project, which considers the demand and requirements of the local communities, establishes infrastructure for specialization of the universities, and improves structures. The project will be funded by the government with 7.5 billion KRW over the next 5 years (until 2019) to develop creative talent to lead the local economy.

Established Technical Innovation Oriented, Self-Supporting Leading Model for Industry-University Cooperation

Among all local private universities, Chosun University and Youngnam University were selected as the 'Technical Innovation Oriented' in the Leaders in Industry-University Cooperation (LINC) Project. The Chosun University project team focuses on future automotive component materials and new and renewable energy resources as its areas of specialization. During the first stage, the team connected future automotive components and new and renewable energy industries with relevant departments and graduate schools to create a leading model for technical innovation-oriented industry-university cooperation. For the second stage starting in 2015, it is creating a leading virtuous circle model for an innovative ecosystem of industry-university cooperation.

Complete Scholarship Coverage, 100% Employment for Graduate Schools of Root Industries

The Dept. of Welding & Joining Science Engineering was established in 2014. It is the first such department of its kind in Korea and was quickly selected for the 'Technical Experts in Root Industries Development Project' that will be funded by the government with 3 billion KRW for 5 years. Students will be awarded complete governmental scholarships for their two-year education and will be guaranteed 100% employment after finishing graduating. Furthermore, the school has also been selected for the 'Foreign Experts in Root Industries Development Project' where international students apply for permanent residency or citizenship after working for 5 years at a "root industry" company.

4

Increased Employment through Scholarships and Student Welfare

Chosun was ranked as having the highest graduate employment rate in the Gwangju-Jeonnam region for two consecutive years (2013 and 2014). In 2013, the employment rate was 52.6%. Among universities with more than 3,000 graduates, Chosun University ranked 15th nationwide, and first in the Gwangju-Jeonnam region. In 2014, the employment rate was 55.3%, ranking 10th nationwide and first in the Gwangju-Jeonnam region, reinforcing its position as the leader of "practical talent development."

Key Initiatives

- Recruit outstanding students
- Enhance scholarships and student welfare support
- Enhance competency for employment

Highest employment rate in the Honam region

Top #1 business incubation support for students

60.6 billion KRW in scholarships in 2015

Top #1 Business Incubation Support for Two Consecutive Years

To date Chosun University has invested a total of 2,275.76 million KRW in school expenditure and government funding to support students' business incubation, ranking first in Korea for two consecutive years. As a result, two student enterprises have been established which have been ranked 4th in student startup sales volume. At present, 636 students belong to 41 business incubator clubs to prepare for their startups, reinforcing Chosun University's reputation as the 'national top #1 business incubator' and as a 'student startup kingdom'.

Systematic Employment · Startup Support

Starting from the freshman year, students are encouraged to seek their career according to their aptitude, so subjects related to employment are included in the curriculum, such as Employment Training (KT&G, Samsung Life & Insurance), CEO Lecture, Self-exploration and Future Planning, and CU Job Mentoring. Furthermore, employment support programs including employment field work, employment clubs, In Search for Mentors, employment mileage, and the Gold Club are operated to ensure successful employment as much as possible. The Business Incubation Support Center supports business startups through employment education including business incubation lectures, competitions, camps and exhibitions.

Selected as 'K-MOVE School' by the Human Resources Development Service of Korea

Chosun University was chosen to be a 'K-MOVE School', which is an overseas employment training project of the Human Resources Development Service of Korea. The project aims to develop international business talent who can fill employment needs in the US. The LINC Project Team is implementing its Global Capstone Design Program that is encouraging overseas employment in partnership with KOTRA and KOICA.

A Wide Range of Scholarship Programs are Available

Excellent students selected as the result of entrance exam scores are rewarded with full two-year tuition scholarships, and for the Departments of Medicine, Dentistry and Pharmacy the students are awarded full four-year tuition scholarships. For enrolled students, excellent grade scholarships, national merit scholarships, daily expense scholarships, special talent scholarships, international student scholarships, family scholarships, scholarships by external social organizations are all available to encourage academic effort.

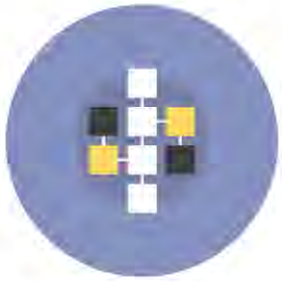
5

User-Centric Academic Administration System

Chosun University radically reformed its academic system, integrating 15 similar departments into a total of eight. Furthermore, the administration system was restructured for efficiency establishing the Human Resources Management HQ and reducing 63 administration teams into 53. This trend will continue to improve and introduce systems to build a more user-centric academic administration.

Key Initiatives

- Restructuring to reinforce core administrative functions
- Enhance educational administration support systems for each department
- Build integrated system for student counseling
- Enhance educational programs for building faculty capabilities



Restructuring according to academic division

Number of administration teams reduced to 53

Top 3.5% in world university rankings

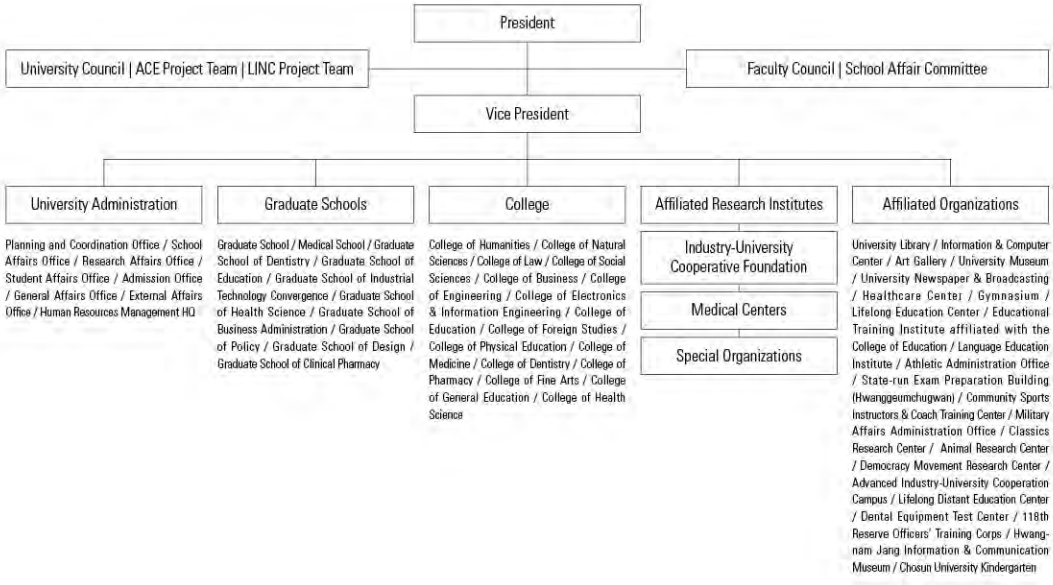
Top 3.5% in World University Rankings

Chosun University has continuously improved its standing in key performance indexes through innovations such as academic division restructuring and reducing its tuition fee dependence rate by 8%. As a result, the university was ranked 878th or among the top 3.5% of 25,000 universities surveyed in the CWUR World University Rankings.

Awarded 2015 Grand Prize for a university with 'Advanced Educational Capability' from University News Network

Perhaps one of the most notable recent achievements of Chosun University is that in 2015 the university had been selected by the University News Network Awards for its educational capabilities. It was recognized for its leadership in education for establishing a user-centric student support system and for presciently converging its academic system.

Organizational Chart



6

Financial Integrity and Infrastructure Building

Chosun University has the highest educational expenses per student in the Gwangju-Jeonnam region at 11.321 million KRW per student (Source: Ministry of Education, 2014 Private University Finance and Accounting Index).
It is a financially stable university with zero debt yet investing aggressively to enhance the academic environment for the students.

Key Initiatives

- Efficient execution of school expenses through cost reduction
- Designation as a department of management for cost reduction
- Seek profitable business to ensure financial integrity

Zero debt

50 billion KRW in government funding

Lower dependence rate on tuition fees

Selected for six government-funded national projects

Selected for no fewer than six national projects such as ACE, supporting high school education, CK-1, BK21 project, LINC, and business incubation leadership development project. Chosun University is the only school in the Gwangju, Jeonnam and Jeju regions to be selected for six national projects. As a result, it will be funded with 50 billion KRW from the government per year.

Consistently reduced dependence rate on tuition fees

Every year, financial integrity is being enhanced with external support such as from government funding and development funds. Internally, labor and operational costs are constantly being reduced. Therefore, the dependence rate on tuition has been reduced from 79.4% in 2012, to 75.0% in 2013, to 71.4% in 2014.

Government-funded National Projects by Year

Year	Project	Funding	Year	Project	Funding
2012	Leaders in Industry-University Cooperation (LINC) Project	19.7billion KRW/5 years	2014	Brain Science Original Technology Development Project	14.7 billion KRW/6 years

7

Global Capability and Educational Environment Enhancement

Chosun University has advanced globally, not only distinguished universities in the United States, Germany, China, Japan, and Australia, but also Africa, the youngest continent in the world, India, the IT power with infinite potential, Mongolia showing strong economic growth, and all regions of the globe.

As a result, agreements with universities and institutions increased from 22 nations, 124 agreements in 2012 to 42 nations, 684 agreements in 2016.

Key Initiatives

- Enhance recruit and management of international students
- Expand international exchange and internationalization programs
- Build foundation for major lectures in English
- Expand English-only dormitories/spaces

42 nations with international agreements

684 international agreements with universities and institutions

High-education university, Leaders for the future

The philosophy of the 72,000 Founders' Association, to 'build a strong nation, and develop talent for world prosperity' has been succeeded for 70 years as Chosun University foundation philosophy. Based on such philosophy, Chosun University aims for the development of right talent fit for the modern society, and the evolution of educational systems. It will continue its efforts towards developing talented leaders with various capabilities.

FOUNDATION PHILOSOPHY

Build a strong nation, and develop talent for world prosperity

EDUCATION MISSION

Develop creative talent with focus on originality

Develop talent for technological leadership in the information era

Develop social leaders with strong volunteer spirit

Develop professional talents with global perspective

'TOGETHER' TALENT – 3C CORE CAPABILITIES

CONFIDENCE

CONVERGENCE

COLLEGE OF HUMANITIES

Values exceeding technology. The power of humanities

"It's technology married with liberal arts,
married with the humanities,
that yields us the results that make our heart sing."

Steve Jobs

The College of Humanities was established in 1946, aiming for humanism based on literature, history, and philosophy. In the 21st century, it is focusing its efforts to perform the role of humanity in an era of knowledge and culture. In connection with the Gwangju Asia Culture City, it is focusing its education on humanities and related academics with the aim to develop talents who will take active roles in various cultural industries. In this respect, university and affiliated research centers such as the Humanities Research Institute and Classics Research Center have been established. Furthermore, it has built co-operative systems with local universities and the community, and is focusing its efforts on developing talent to create cultural contents that utilize high-tech media with its foundation on classics. It is devoted to the primary role of humanities, which can be neglected in the age of limitless competition, and contributes to creating a bright future in co-operation with the local community.

PURPOSE

Aiming for humanism, the purpose of College of Humanities is to reestablish the position of humanities in the modern society, create new theories and knowledge, and enhance the quality of life through its application. It takes the role in connecting humanistic spirit to social ideologies, to establish the identity of Korean literature, contribute to the growth of local and national culture, national development, and world prosperity.

TARGET

- To develop critical, intellectual, practical thinking skills required for the field of humanities including language, literature, history, and philosophy.
- To promote practical efforts and academic exchange to contribute to the society and the times.
- To develop talents that will lead the globalization and information age through comprehensive culture research with its foundation on humanities.

COLLEGE OF NATURAL SCIENCES

The origin of integrated science, discovering the mystics of all creations

"I was like a boy playing on the sea-shore,
and diverting myself now and then finding
a smoother pebble or a prettier shell than ordinary,
whilst the great ocean of truth lay all undiscovered
before me."

Isaac Newton

Chosun University College of Natural Sciences has a sound history and tradition in the research of basic sciences. It focuses on basic theories on natural phenomenon, and also theories and application capabilities required for high-tech science and industrial development.

Natural science is the basic study of various theories, from material analysis to life phenomena. Thus, it is the origin of integrated sciences necessary for developing new technology to enhance national competence in the 21st century. In an era of advanced science, it holds the optimized environment for education and research, with scholarship benefits and employment support systems. This has been built through professors' research results, being selected for numerous national projects. Furthermore, it holds global competence through specialized research institutes including the Chosun University National Research Project for Dementia supported by the Ministry of Science, ICT and Future Planning, BK21 PLUS Project supported by the Ministry of Education, & Marine Bio Research and Education Center supported by the Ministry of Oceans & Fisheries.

PURPOSE

The College of Natural Sciences has its foundations on the education philosophy of Chosun University. Its purpose is for students to acquire basic theories on natural phenomenon and application capabilities, as well as creative thinking skills and ethics to contribute to the development of science technology, and enhancement of people's lives.

TARGET

- To foster experts in the research of natural phenomenon
- To actively respond to global academic trends in natural sciences, and develop skills to acquire latest information through education
- To educate for creativity, originality, and quality of life enhancement
- To foster leaders of the future society through diverse teaching-learning methods

COLLEGE OF LAW

The realization of justice. Fair and honest.

"No man is above the law and no man is below it."

Roosevelt

The College of Law was one of the leading departments at Chosun University's foundation in 1946. Ever since, it has been educating talents with sense of mission and challenging spirit. The talents from the College of Law have contributed to the modernization and democratization of Korea, and are actively working in the field of law, politics and academics. It has high-tech lecture rooms, seminar rooms, mock courtrooms, and law school library. Exam preparation rooms are operated for students preparing for state-run exams. Furthermore, a wide variety of scholarship programs are supported so all students with academic enthusiasm may benefit from them. It has been a long tradition of Chosun University to develop talents for the Bar Examination, police force, court officers, public prosecutors, and entrance to the Graduate School for Law. Also, it aims to foster reliable legal talents for companies and the society.

COLLEGE OF SOCIAL SCIENCES

A sharp insight for a better society

"It may look impossible in the short-term,
the society is always evolving in the long-term.
Therefore, even if it seems impossible right now,
we must find an alternative,
and discuss about it."

Ha-jun, JANG

The College of Social Sciences aims to develop leaders for the digital era, who interpret humans and social phenomenon from various perspectives to understand the essentials of social phenomenon. The underlying philosophy is co-operation and synergy.

Systematic support for an academic community has been prepared, through a wide curriculum, superior faculty, and multimedia education environments. Furthermore, it supports research activities to share and find alternatives to social matters, and is developing into a distinguished academic community through various symposiums and seminars. It shares a sense of mission that teachers and students should teach and learn from each other, and aim for a brighter future.

COLLEGE OF BUSINESS

Global leader of the world economy

"Each knowledge worker should think and behave like a chief executive officer."

Peter Drucker

Since its founding in 1946, no fewer than 20,000 talented alumni have come forth. At present, there are 2,700 students enrolled and 50 professors who together are moving the local school of business into the future. In order to respond to rapid changes, in addition to major subjects such as economics, business and trade, many industry-university co-operative educational projects and international projects are being operated to develop professional talent in industrial marketing, China businesses and East Asian economics. As a result, user-centric, 21st century global leaders with practical knowledge are being fostered. Furthermore, various employment support programs for state-run examinations, certificates, practical language skills with native speakers, and competitions are being operated. All education is centered at the university campus, developing into a distinguished university based on its 70 years of tradition.

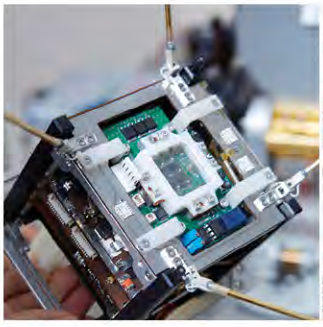
COLLEGE OF ENGINEERING

The core of future high-tech science and technology

"Any sufficiently advanced technology is indistinguishable from magic."

Arthur Clarke



The College of Engineering has developed continuously throughout its history of seventy years. At present, it boasts a scale of fifteen departments and 5,000 enrolled students. One of the three founding philosophies of Chosun University is 'productive education'. In order to achieve this, industry, university and research institutes are organically connected at Chosun University, and they are connected so well that it has become the mecca of industry-university co-operation in the Honam region.

For the first time in Korea, the Advanced Industry-University Cooperation Campus was established within the Gwangju Scientific Industrial Complex. Talent with practical knowledge is being developed with advanced production equipment, R&D common application equipment, educational facilities, business incubators and others. All the departments in the College of Engineering acquired engineering accreditation and have been recognized for developing creative engineers and realizing the global standards of engineering education.

COLLEGE OF ELECTRONICS AND INFORMATION ENGINEERING

Leader of IT convergence technology for digital revolution

"If the future society will be dependent on information, the leading nation will be that which possesses the best computers and software, and communication means."

Alvin Toffler

The College of Electronics & Information Engineering at Chosun University was the first IT department established in the Honam region. The faculty and staff, with their high-tech facilities and equipment, are recognized as leaders at developing IT talent who take the initiative in innovative revolutions. There are 2,000 students enrolled across three departments in a high-tech building stretching over 18,000m^2 preparing to lead the future with innovations.
The passionate lectures of the professors and their outstanding research achievements, active participation in national projects, active participation in ITBI and IBI Center projects for local venture development, accreditations of all departments for engineering education all contribute to the development of creative engineers in the global era.

COLLEGE OF EDUCATION

The passion for learning towards genuine education.

"Education aims at producing decent human beings not machines."

Rousseau

The College of Education was established in 1965 and ever since then has been developing teachers blessed with sound teaching philosophies, heart and expertise. Based on the philosophy that education begins with love, the faculty is considerate towards students while the students practice voluntary works and education training in no fewer than 100 affiliated institutions. The College of Education has been selected for two projects of the Creative Korea-1 project in September 2014, which is a strategic project of the Ministry of Education. Participating students will receive scholarships for their four-year tuition fees, and develop into experts for local community development and related fields. Furthermore, it has established a U-Learning & Teaching Society with professors, students, alumni and the local community. It is reinforcing its position as the training center for advanced teachers who will lead lifelong education in the 21st century.

COLLEGE OF FOREIGN STUDIES

The foundation of a smaller world, the global era

"Those who know nothing of foreign languages know nothing of their own."

Goethe

The College of Foreign Studies at Chosun University was established in 1979 as the second of its kind in Korea. Currently, it is the Honam region's only specialized institution for foreign languages from which many global talents have come forth.

The College of Foreign Studies has interpretation and translation laboratories where five languages can be interpreted simultaneously, multi-purpose lecture rooms to develop creative and problem-solving skills through integrated curriculums, and high-tech education facilities such as the Capstone Design Hall. It is conducting specialized education for eight world languages: English, Chinese, Japanese, Spanish, Arabic, German, French and Russian. The faculty has rich expertise in each of the language groups and is developing international talent with linguistic and cultural communication skills for the 21st century.

COLLEGE OF PHYSICAL EDUCATION

Enhance quality of life through sports

Due to the increase of national income and economic development, physical education has become one of the most promising businesses in the 21st century. The sports industry, with its high added value, has become important. The College of Physical Education approaches its mission with a philosophy of holistic education to develop talented physical education instructors possessing creative thinking skills and a balance of knowledge, virtue and physical strength. The college also develops talent for sports industries who are skilled not only in sports but also in business and marketing. In order to achieve this, education in systematic, specialized theories and scientific experimentation and practice is taking place. Furthermore, the Teacher Certification Preparation Class is proud of its high acceptance ratio, and many secondary physical education teachers are coming forth.

"A healthy mind in a healthy body."

Juvenal

PURPOSE

To develop socially responsible, talented physical education instructors with specialized theoretical knowledge and scientific practical skills

TARGET

To develop physical education instructors and dancers with physical (fitness and exercise), cognitive (specialized knowledge, high mental processes to respond to various situations, problem-solving skills), just (spirit of sacrifice, self-confidence, responsibility, fairness, co-operation, law-abiding spirit), social service (promotion, protection, and development of national health) attitudes.

COLLEGE OF MEDICINE

Medical science for people We practice humanitarian medical service

Established in 1967, the College of Medicine at Chosun University was the first local private medical school in Korea. The school has been developing skilled medical professionals with a sense of vocation and deep respect for life. The school is fully equipped with clinical training centers, clinical trial centers, multi-media education rooms, a problem solving center, medical information center, and state-of-the-art anatomy training rooms. Self-initiated learning, integrated education, mock patient education, and advanced training education programs are all being conducted. Various international training systems are conducted in connection with overseas volunteer works and training. Until 2016, it was operated with the Graduate School of Medicine but from 2016 it has been totally converted to the College of Medicine to develop into an internationally competent medical school to lead Korea's medical education.

"Wherever the art of medicine is loved,
there is also a love of humanity."

Hippocrates

PURPOSE

To understand the sanctity of life and develop qualities medical personnel should have. To foster doctors and nurses for primary health and medical care possessing basic medical knowledge and skills.

TARGET

To educate ethical norms as a medical professional with a concern for national and local social matters, and a service spirit for the promotion of the health of local communities.

COLLEGE OF DENTISTRY

Oral health is the basis for today's extended life span

Established in 1974, the College of Dentistry at Chosun University was the first of its kind in the Honam region. It aims at developing expertise in research, therapy and volunteer work through synergies of clinical practice, natural sciences and the humanities. In 2009 it was changed to the Graduate School of Dentistry but in 2015 was reverted to the College of Dentistry. The college is now taking a leap towards becoming a globally leading college with sisterhood relationships with the Gottingen College of Dentistry in Germany, Tokushima College of Dentistry in Japan, the colleges of dentistry at Alabama University, San Francisco University, and Pennsylvania University in the USA.

PURPOSE

To develop dentists who contribute to oral health through education, academic research and social service.

TARGET

- To apply basic dental medicine and related academics to solve clinical problems
- To prevent, diagnose, and treat oral and maxillofacial diseases
- To acquire the latest dental medicine information and accept selectively (critically)
- To understand social responsibilities as medical personnel, and solve oral health problems in the local community

COLLEGE OF PHARMACY

The gatekeeper of national health

Since its founding in 1954, the approximately 4,800 graduates of the College of Pharmacy have been working actively as leaders in government affiliated institutions and research centers, hospitals, pharmacies and industrial organizations. In 2011, the program was extended to six years (2+4) to reinforce expertise and practical pharmacy education. Investments have been made in staff and facilities to become a global leader in the field of pharmacy, such as high-tech lecture rooms, excellent faculty, and the establishment of the Graduate School of Clinical Pharmacy.
Systematic education for the holistic process of new pharmaceutical development, from basic theories on natural substances and Oriental resources to synthesis, pharmacology and medication is being offered. Sisterhood relationships have been made with globally distinguished universities to develop global talents.

"Good medicine is bitter to the tongue."

Confucius

PURPOSE

To educate academic theory and knowledge on medicine and medical supplies, and broad and practical technology. To contribute to the prevention and treatment of diseases while promoting national health through fostering skilled medical professionals.

TARGET

- To develop pharmacists capable of precise prescription and dosage administration based on rational medicinal therapy and medical information (reinforcement of clinical pharmacy)
- To develop research capabilities in the fields of medicine and pharmacology
- To develop pharmacists for the fields of health, environment and food hygiene (focus on practical education)

COLLEGE OF ART AND DESIGN

In-depth research into aesthetics

"In art you have to do something nobody has done before.
It's about doing something different, not coming in first."

Nam-June Paik

The College of Art & Design is a specialized school that develops global talent with international capabilities in co-operation with the National Asia Culture Complex. In order to achieve its goal to become the core of Asian culture and the mecca of the arts industry in the 21st century, it executes specialized integrated education utilizing advanced facilities and equipment. There are 6 departments and 10 majors offered at Chosun University's College of Art & Design. No fewer than 40 professors with international experience and practical careers are fostering students' limitless potential through high-tech facilities and advanced educational programs. Furthermore, it has entered business agreements with foreign distinguished arts and design colleges, and specialized institutions. The Affiliated Graduate School of Design, Culture and Art Industry Research Center, Chosun University Art Gallery, and Kim Bo-Hyun-Sylvia Wald Museum of Art are organically connected to develop into a globally distinguished school of art.

COLLEGE OF GENERAL EDUCATION

The foundation of all academics

The College of General Education aims at developing ethical personalities with aesthetic sensibilities, integrated and creative thinking skills, and communication skills as community members in the global era.
The Division of Undeclared Majors recruits students without a fixed major who, after one year of exploration, select their major. Intensive English as a second language classes and "thinking and expression" courses are mandatory for all students, so that they may develop global communication, critical thinking and logical expression skills. Supervisors are allocated to each of the six majors to provide counseling from entrance until major selection.

COLLEGE OF HEALTH SCIENCES

Health experts with a love for mankind

The College of Health Sciences aims to develop specialized health and medical personnel for various fields of rehabilitation therapy, such as mental health, rehabilitation and special education services. It is based on the integrated education and research paradigm of specialized knowledge, research capabilities and international competence. The college recruits talented faculty and students, and has built an alumni support system. At the same time, it is developing English lectures to prepare students for globalization, and participating in large-scale, national health and medical projects. Students are given theoretical and practical education through academic-integrated education, regionally specialized education, and global competence education. In addition, they receive field practice at Chosun University Hospital to develop their skills and capabilities as health and medical specialists.

"It is best to prevent diseases, rather than seek their causes and therapies."

SPECIAL GRADUATE SCHOOLS

Graduate School of Education

http://www.chosun.ac.kr/edu/

The Graduate School of Education was established to develop specialists in education. It provides the best educational services including specialized curriculums to foster professionalism of teachers, educational systems for the global, information-oriented society, building of human and financial infrastructure, education systems for local community service, support systems to develop faculty's specialties, high-tech education facilities, and educational welfare service enhancement.

Graduate School of Industrial Technology Convergence

http://www.chosun.ac.kr/gi/

By organically harmonizing education and onsite technology, the Graduate School of Industrial Technology Convergence educates students to understand and respond to the issues of modern industrial society. Based on engineering knowledge, graduates study and research the theory and practice of specialized technology and management. Through industry-university co-operation, it aims at fostering distinguished technicians and businessmen who will resolve technical and social problems.

Graduate School of Health Science

http://www.chosun.ac.kr/ehs14/

Graduate School of Health Science aims at nurturing leaders with creative skills who can enhance individual health and welfare, while improving national health. Furthermore, it is focused on developing experts who will contribute to the local community, national health and general welfare of the people.

Graduate School of Business Administration

http://www.chosun.ac.kr/gsba/

Modern society requires segmented knowledge and in-depth capabilities. The Graduate School of Business Administration aims at nurturing business leaders who creatively and actively respond to the rapidly changing business environment by imparting them with both a sound theoretical foundation and practical skills.

Graduate School of Policy

http://www.chosun.ac.kr/gsp/

The Graduate School of Policy aims at developing talents who will contribute to the local community and the nation when working in the local self-government era of the 21st century. In order to recruit and foster leaders for public policy, various departments and curriculums have been established, such as the Department of Public Administration, Military Science, Social Welfare, Addiction Rehabilitation Welfare, and Leadership courses.

Graduate School of Design

http://www.chosun.ac.kr/gsd/

The Graduate School of Design aims at developing designers and art therapy specialists who will contribute to commercial and cultural arts based on modern design philosophies. This endeavor has been intently developed as a core area of the 21st century knowledge-based society through industrial design specialization projects, the New University for Regional Innovation project, the Formative Arts Research Center, the Design Venture Project, and connections with student clubs.

Graduate School of Clinical Pharmacy

http://www.chosun.ac.kr/clinicalpharm/

The Graduate School of Clinical Pharmacy aims at developing patient-oriented pharmacists and clinical pharmacy experts with integrated knowledge of medicine and pharmacy. It aims at leading the advancement of pharmaceutical care through building the knowledge, research and practical skills required for the promotion of rational pharmacology in the rapidly changing medical industry.

Chosun University, a happy place for all students and the local community

Chosun University strives to enhance the quality of students' lives while developing them into talents who will contribute to the nation and mankind. The university library and dormitory where students spend most of their time have an optimized environment with high-tech equipment and eco-friendly facilities. Furthermore, various facilities and programs are open to the local community.

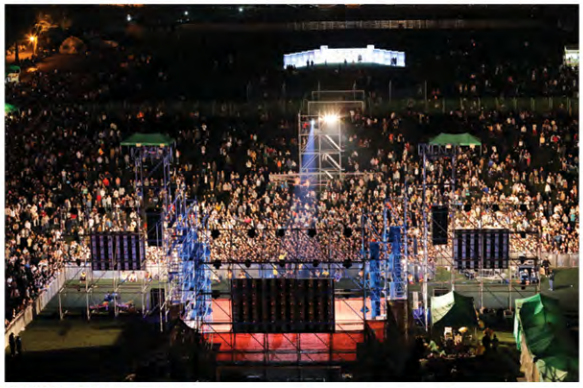
74 Shared Growth with the Community 76 Campus Map



A Field of Harmony and Communication

School Life

The best talent and a happy local community developed from the best academic environment.

The University Library makes the Campus a'Premium Place for Reading'

The University Library opened in 1950 and has since collected over 1.2 million books. The Chosun University library is the most advanced repository of knowledge in the Gwangju-Jeonnam region along with 12 archives and additional multimedia information centers. Since 2008, the library has operated a first-of-its-kind-in-Korea reading and debating club under its slogan of"Readers will be future leaders!" and other programs, making it a premium place for reading.

A happier university life, together with the community

Bitgoeul Boeun Festival

The Daedong Festival was renamed as the Bitgoeul Boeun Festival in 2013. It is the representative local festival in the Gwangju region to honor the citizens who contributed to the university's foundation.

Rose Festival

No fewer than 230 species of beautiful roses blossom every year in this Rose Garden. Since 2003, the Rose Festival has taken place every year, and people from all over the nation come to enjoy the festival.

Chosun University dormitory enhances the quality of life

Baekhakhaksa

Baekhakhaksa is a nine-storey eco-friendly dormitory with two basement floors. It also offers meeting and study places with a clean environment. The building uses clean renewable energy and has an eco-friendly operational system.

Global House

Global House is a nine-storey dormitory with two basement floors with the most advanced facilities possible. The English Only Zone offers high-tech language facilities with native-speakers as tutors.

Green Village

Green Village, with space for up to 170 people, is exclusive for international faculty and students. Each room has conveniences such as air conditioners and internet access.

Global Brand Value Creation

—

International Exchange Activities

The global campus
and global alumni of Chosun University

A global campus, exchanging culture with the whole world

Chosun University is active in exchange activities with 690 universities and institutions in 42 nations not only with distinguished universities in the US, Germany, China, Japan and Australia, but also in Africa, India and Mongolia.

Global alumni of Chosun University

Chosun University aims to build a global network of alumni, and runs various programs with globally distinguished universities, such as exchange student programs, cross-registration programs, language training, Common Research Centers, and volunteer work programs.

Korean Language Education Institute

The Korean Language Institute offers programs to foster Korean language teachers and also teaches the Korean language to foreigners. The institute operates with the aim of developing global talent with international competence, practical language education and training to enhance students' language skills.

Shared Growth with the Community

Voluntary Work

Chosun University seeks people who are not reclusive
but rather those who prefer to be together with others and work for society.

Talented students who lead mutual growth cooperatively with local communities

Chosun University, aiming for shared growth with the local community, follows the motto of "one person with one volunteer activity" for all members of the university, and operates a locally connected cultural talent development program.

Raising global leaders through international volunteer activities

Chosun University sponsors international volunteer activities every year during vacation periods to develop students into global leaders with global perspectives.

Volunteer Medical Team of Chosun University Hospital and Dental Hospital

The Volunteer Medical Team of Chosun University Hospital and Dental Hospital provides free medical treatments, therapies and surgeries to the medically disadvantaged both at home and abroad.

Volunteer groups of allied universities

Four universities in the Yeongnam and Honam region (Chosun University, Dong-A University, Yeungnam University and Wonkwang University) have come together to offer various volunteer services to the local community and those in need.
